

Geography in the Early Years at St.Peter's

The EYFS framework is organised differently to the National Curriculum that is used for children in Year 1 to Year 6: it is organised across seven areas of learning rather than subject areas

The table below identifies the statements taken from the 2020 Development Matters which are prerequisite skills for Geography within the National Curriculum.

The most relevant statements for Geography are taken from the following areas of learning:

- Mathematics
- Understanding the World

Children have the opportunity to develop early skills in Geography as part of the daily continuous provision and focussed sessions in our early years provision.

Three and Four-Year- Olds	Mathematics		 Understand position through words alone. For example, "Thebag is under the table," – with no pointing. Describe a familiar route. Discuss routes and locations, using words like 'in front of'and 'behind'.
	Understanding the World		 Use all their senses in hands-on exploration of naturalmaterials. Begin to understand the need to respect and care for thenatural environment and all living things. Know that there are different countries in the world and talk about the differences they have experienced or seen in photos.
Reception	Understanding the World		 Draw information from a simple map. Recognise some similarities and differences between life inthis country and life in other countries. Explore the natural world around them. Recognise some environments that are different to the one inwhich they live.
ELG	Understanding the World	People, Culture and Communities	 Describe their immediate environment using knowledge from observation, discussion, stories, non-fiction texts and maps. Explain some similarities and differences between life in this country and life in other countries, drawing on knowledge fromstories, non-fiction texts and (when appropriate) maps.
		The Natural World	 Know some similarities and differences between the natural world around them and contrasting environments, drawing ontheir experiences and what has been read in class. Understand some important processes and changes in thenatural world around them, including the seasons.
